Projects

Placement Management System

The Placement Management System is a web application designed to make the placement process in educational institutions easier and more organized. It is built using HTML, CSS, JavaScript, and PHP.

Guide: Mrs.M.Manimegalai AP/IT

Net Profit Margin Calculator

Developed a Net Profit Margin Calculator web application using React, Tailwind CSS, and Node.js to help businesses quickly and accurately determine their net profit margin.

Guide: Mrs.V.Anitha AP/IT

Internship

Alpha Business Solutions

Worked as a Frontend Developer in Alpha Business Solutions and started adapting to their Technologies like Tailwind CSS, React and involved in the development of a specific tool in their 72BusinessTools project.

INOAUG (Oracle Apex)

I completed an Oracle Apex intensive program offered by INOAUG, which concentrated on SQL, PL/SQL, and related technologies. Throughout the program, I learned the basic concepts and their applications.
